PROFESSIONAL SUMMARY

Full Stack Developer specialized in backend and Linux infrastructure. Experience modernizing critical enterprise systems from legacy architecture (Apache Cocoon) to microservices with NestJS (TypeScript), TypeORM, PostgreSQL, and Flutter Web. Strong knowledge in RESTful API design, Clean Code, SOLID principles, and automated testing (Jest, Gherkin/BDD).

WORK EXPERIENCE

AG Software S.A. — Junior Full Stack Developer

January 2026 – Present | Managua, Nicaragua

- Technically participated in migrating the payroll platform from an Apache Cocoon monolith to a decoupled microservices architecture with NestJS, TypeORM, PostgreSQL, and Flutter Web on Fedora Linux.
- Modernized and optimized critical financial and transactional modules (Advances, Subsidies, Deductions, Loans, and User Management), unifying business logic with the existing mobile application.
- Designed and built reactive, accessible web interfaces in Dart/Flutter Web using the BLoC pattern, and implemented RESTful services with JWT authentication, fine-grained authorization, and efficient relational persistence.
- Ensured software quality and robustness through unit/integration testing in Jest and BDD/Gherkin behavior-driven testing in the frontend, actively participating in continuous delivery and planning under Scrum methodology.

FEATURED PROJECTS

Medical Appointment Management System | Java 21, Spring Boot 3.3, Spring Security, PostgreSQL, Docker

- Designed and implemented a scalable backend architecture with role-based access control (RBAC for 4 roles), stateless JWT authentication, automated email notification service, over 15 interrelated JPA entities, and over 25 REST endpoints comprehensively documented with Swagger/OpenAPI.

Bookstore Management System | Java 17, Spring Boot 3.3, PostgreSQL, Caffeine Cache, Swagger UI

- Developed a modular RESTful API for 6 core domains, incorporating a global exception handler, advanced validations with Hibernate Validator, Caffeine Cache caching strategy to optimize latency, and over 30 endpoints tested and documented in Swagger UI.

TECHNICAL SKILLS

- **Backend & DBs:** NestJS, TypeScript, Java, Spring Boot, TypeORM, Spring Data JPA, Spring Security, REST APIs, PostgreSQL.
- **Frontend & Tools:** Flutter Web, Dart, BLoC, HTML5/CSS3, Fedora Linux, Docker, Git, Postman, Jest, Gherkin/BDD.

LANGUAGES AND CERTIFICATIONS

- **Spanish:** Native. | **English:** B2 Upper Intermediate (EF SET Certificate 60/100 - reading and professional communication).
